Your Home policy wording

How your policy works

We will insure you within the conditions of this Policy for those insurance covers named in the **Schedule** for any insured event which takes place during the period of insurance referred to in the Schedule (the "Period of Insurance").

Your policy ends at midnight on the last day of each **Period of Insurance**. Thereafter, you may decide to renew your policy on such terms and conditions as we may propose to you at the relevant time. Upon you agreeing to the terms and conditions proposed by us, you and us will, on each occasion, be deemed to have entered into a new contract of insurance in accordance with such terms and conditions.

Each aforesaid new contract of insurance will commence on the date when the main policyholder pays the premium. The persons insured will be covered for the Period of Insurance shown on your renewal **Schedule**.

Changes to your circumstances

Please tell us at your first opportunity, if there are any changes to your circumstances which could affect your insurance. If your circumstances change and you do not tell us, you may find that you are not covered at the time you need to make a claim.

If you are in any doubt, please contact your insurance agent. If you did not arrange your insurance through an insurance agent please contact Quantum Insurance Ltd.

When we are notified of a change, we will tell you or your insurance agent if this affects your policy, for example whether we are able to accept the change and if so, whether the change will result in revised terms and conditions and/or premium being applied to this **Policy**.

Definitions

“Nuclear Material” means:-

i) Nuclear fuel, other than natural uranium and depleted uranium, capable of producing energy by a self-sustaining chain process of nuclear fission outside a Nuclear Reactor, either alone or in combination with some other material; and

ii) Radioactive Products or Waste.

“Radioactive Products or Waste” means any radioactive material produced in, or any material made radioactive by exposure to the radiation incidental to the production or utilisation of nuclear fuel, but does not include radioisotopes which have reached the final stage of fabrication so as to be usable for any scientific, medical, agricultural, commercial or industrial purpose.

“Nuclear Installation” means:-

(i) Any Nuclear Reactor;

(ii) Any factory using nuclear fuel for the production of Nuclear Material, or any factory for the processing of Nuclear Material, including any factory for the reprocessing of irradiated nuclear fuel; and

(iii) Any facility where Nuclear Material is stored, other than storage incidental to the carriage of such material.

“Nuclear Reactor” means any structure containing nuclear fuel in such an arrangement that a self-sustaining chain process of nuclear fission can occur therein without an additional source of neutrons.

“Production, Use or Storage of Nuclear Material” means the production, manufacture, enrichment, conditioning, processing, reprocessing, use, storage, handling and disposal of Nuclear Material.

“Property” shall mean all land, Residential Building/s, structures, plant, equipment, vehicles, contents (including but not limited to liquids and gases) and all materials of whatever description whether fixed or not.

“High Radioactivity Zone or Area” means:-

(i) For nuclear power stations and Nuclear Reactors, the vessel or structure which immediately contains the core (including its supports and shrouding) and all the contents thereof, the fuel elements, the control rods and the irradiated fuel store; and

(ii) For non-reactor Nuclear Installations, any area where the level of radioactivity requires the provision of a biological shield. “Nuclear material” as defined herein.

“Nuclear fission” means a nuclear reaction in which a heavy nucleus splits spontaneously or on impact with another particle with the release of energy.

“Nuclear fusion” means a nuclear reaction in which atomic nuclei of low atomic number fuse to form a heavier nucleus with the release of energy.

“Nuclear radiation” means the absorption of electro-magnetic radiation by a nucleus having a magnetic moment when in an external magnetic field.

“Nuclear waste” as defined herein.

“Nuclear fuels” means a substance that will sustain a fission chain reaction so that it can be used as a source of nuclear energy. “Nuclear explosives” means an explosive involving the release of energy by nuclear fission or fusion or both.

“Nuclear weapon” means a nuclear device designed, used or usable for inflicting bodily harm or property damage.
